## EDUCATION

### University of California - Davis

Bachelor of Science in Computer Science

- Dean's Honor List
- Major GPA: 3.75/4.00

Expected Graduation 2024

### Dwight School Seoul

International Baccalaureate Diploma

- Student Council President
- Honor Roll

August 2015 - June 2018

---

## WORK EXPERIENCE

### Road to Success Education

Web Developer / HTML, LaTeX

- Created online testing platform that provides practice standardized test for high school students
- Refactored data processing of user management platform for automated grade reporting system
- Taught high-school mathematics, physics, and chemistry

Seoul, Korea

April 2021 - August 2021

### ROK Army The 37th Infantry Division

Satellite Operator, Squad Leader

- Managed satellite communication channel to serve as a form of backup communication
- Implemented framework to use satellite for communication in any remote area
- Operated cryptographic equipment and radio/frequency antennas
- Translated for ROK-US joint military exercise

Chungcheongbuk-do, Korea

October 2019 - April 2021

---

## SOFTWARE PROJECTS

### Battleship / C++

- Created Battleship game with varying user configuration through object-oriented programming
- Implemented three different modes of playing between AI and human with options for difficulty
- Developed smart AI that performs based on previous events and actions

### SearchBooks / C++

- Created a program that catalogs books and searches requested books using linear search and binary search
- Analyzed and justified the time complexity for each search and the application in a real-life situation
- Used operator overloading to effectively sort with multiple criteria

---

## THESIS

### Determining the length of a knot by Lagrange polynomial interpolation

- Compared the calculation of length by using Lagrange interpolation of different degree with Gaussian quadrature
- Performed error analysis of different crossing numbers of knots and to the theoretical length by definite integral

---

## SKILLS

Languages: English - Fluent, Korean - Fluent  
Programming Languages: C/C++, HTML, Python  
Technical Skills: Adobe Illustrator, Adobe Photoshop
